PROFESSIONAL SUMMARY

Software Engineering graduate (BS, University of Engineering and Technology Lahore, GPA 3.18) with hands-on experience in full-stack web development, mobile application development, and applied machine learning. Skilled in building scalable, production-ready applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), .NET/C#, and MySQL, with practical exposure to AI/ML pipelines, large language model (LLM) integration, and data visualization through independent and academic research projects. Strong foundation in RESTful API design, database management, and Agile/Scrum collaboration. Seeking full-stack development or AI/ML engineering opportunities where cross-stack technical skills can be applied to deliver reliable, high-quality software.

TECHNICAL SKILLS

Programming Languages: C, C++, C#, Java, Python, JavaScript

Frontend Development: React.js, HTML5, CSS3, JavaScript (ES6+), WordPress, Framer

Backend Development: Node.js, Express.js, .NET, PHP, RESTful API Design & Integration

Databases: MySQL, MongoDB, Supabase

AI/ML & Data Science: Machine Learning, Predictive Modeling, Data Preprocessing, Data Analysis, Data Visualization, Scikit-learn, Pandas, NumPy, LLM Integration (Qwen, LLaMA), Prompt Engineering (Zero-shot, One-shot, Few-shot)

Tools & Platforms: Git, GitHub, Jira, Trello, Agile/Scrum, Vercel

Core Strengths: Problem Solving, Collaborative Teamwork, Client Communication, Client-Focused Delivery

PROFESSIONAL EXPERIENCE

Frontend Developer Intern Aug 2025 – Oct 2025

Scandictech — Denmark (Remote)

- Built and maintained responsive user interfaces using React.js and modern JavaScript, contributing to core product frontend features.
- Collaborated with a distributed, cross-functional engineering team following Agile/Scrum practices to deliver iterative feature releases.
- Wrote clean, reusable UI components and integrated RESTful APIs to connect frontend functionality with backend services.

Web Development Intern Jun 2024 – Aug 2024

Punjab Information Technology Board (PITB) — Lahore, Pakistan

- Developed and maintained web application features as part of a government digital services initiative, gaining exposure to enterprise development standards.
- Applied HTML, CSS, and JavaScript to build functional, user-facing web components under senior developer guidance.
- Participated in code reviews and collaborative version-control workflows using Git.

KEY PROJECTS

CrimeLens — AI-Driven Crime Intelligence & Predictive Analytics System (Final Year Project) — *Python, Machine Learning, LLMs (Qwen, LLaMA), Prompt Engineering*

- Designed and built an end-to-end data pipeline for crime-related datasets, covering collection, preprocessing, feature engineering, and structured labeling.
- Integrated LLMs to enable natural language querying, automated crime report summarization, and contextual reasoning over crime data.
- Applied zero-shot, one-shot, and few-shot prompt engineering alongside domain-specific fine-tuning to improve model adaptability and predictive performance.

- Built an interactive analytics dashboard for crime trend visualization and hotspot detection to support research-based decision-making.

Spotify Clone — Full-Stack Music Streaming Application — *React.js, Node.js, Supabase, Vercel*

- Developed a full-stack music streaming application with core playback functionality and a dynamic, responsive UI.
- Deployed the application on Vercel, optimizing for performance and cross-device responsiveness.

Index Food N Feeds — Company Website — *React.js, Node.js, Express, MongoDB*

- Built and shipped a production company website with a React frontend and a Node.js/Express REST API backend integrated with MongoDB.

PhilBox Pharmacy Management System — *PHP, Bootstrap, MySQL*

- Built a full-stack pharmacy management application to handle medicine inventory and order processing, with a Bootstrap-based responsive frontend.

Cafe Management System — *C#, MySQL*

- Developed a database-driven desktop application covering order management, billing, inventory tracking, and user authentication.

Juice Shop Management Application — *C#, .NET*

- Built a desktop application with a database-driven backend for product management, billing, order processing, and inventory tracking.

Portfolio Website — Vivere Concepts (Architecture Firm) — *WordPress CMS*

- Delivered a complete WordPress CMS-based portfolio website as a professional freelance client project.

EDUCATION

BS, Software Engineering — University of Engineering and Technology (UET), Lahore, Pakistan

Dec 2022 – Present | GPA: 3.18 / 4.0

CERTIFICATIONS

- Data Science & AI Masters 2025 — Udemy
- Complete Data Science Bootcamp — Udemy
